

Biology Department Teaching Laboratory Equipment Funds Request Form

Biology faculty and staff can request funds for teaching labs or joint teaching/research equipment. The Biology Teaching Laboratory Equipment Funds requests will be reviewed annually by the Budget Committee and recommendations will be passed to the Department. Levels of funding are determined by end-of-year amounts that remain largely from lab fees. **Requested funds that are approved must generally be spent before the end of May each fiscal year (May 30th).**

The primary objective for use of funds is to purchase, repair, or maintain laboratory equipment used to support laboratory teaching-related activities within the Department. The prioritizing criteria include, but are not limited to, the number of students and the number of different courses benefited annually. Requests that serve the dual purpose of benefiting teaching laboratories and research laboratories will be accepted.

Please **submit this request form and any associated quotes** (3 per item) to the Budget Committee [Dept Teaching Lab Funds Request Folder](#) in the shared Biology OneDrive.

Priority deadline: 5pm, March 31

Requestor:

Select primary use. Both can be indicated: Research Teaching

Total cost of items requested:

Item requested (#1) Cost:

How will this improve your course or research?

It is preferred that requests for research equipment or services be accompanied by matching funds by the requestor. If you will be contributing any matching funds please indicate how much.

What (if any) other researchers or courses plan to use this item? Indicate "none" if you or your course will be the only user.
