

Video Worksheet

Dr. Rich

Spring 2025

Instructions

While watching today's video, you should record three management problems presented at the San Diego Zoo. Attach a sheet of paper with each of your three selected problems following the example below. The prompts are as follows:

- Problem: Describe the problem in no more than 1-2 sentences.
- Animal: Which animal is exhibiting this problem?
- Diet: What type of diet/feeding ecology characterizes this animal?
- Location: In what special area/exhibit of this zoo or any other zoo would you find this animal?
- AZA TAG: To which TAG (Taxon Advisory Group) does this animal belong?
- Category: What technical term/label from class would you use to categorize this problem? *Hint: This may not be explicitly stated in the film, but you should have enough knowledge to label it with a specialized term.*
- Causes: In no more than 1-2 sentences, explain the cause/causes provided or implied for this problem?
- Solution: What solution is offered for this problem, or what solution would you propose?

Assessment

You will be assessed on effort/completion, so do not worry too much about overly detailed descriptions/analyses. Just use this as a guide to think critically about the problems and solutions you observe.

Example

Problem

A mammal habitually licks and mouths stationary, non-food objects, especially metal bars/pipes in their exhibit.

Animal

Giraffe

Diet

Browser

Location

Scott African Grasslands at Omaha's Henry Doorly Zoo

AZA TAG

Antelope, Cattle, Giraffid, and Camelid

Category

Oral Stereotypy

Causes

Frustration of natural foraging patterns, gastrointestinal issues

Solution

Provide animal with plentiful browse and enrichment objects to stimulate natural feeding methods. Increase dietary fiber.
